

Facundo Cabral

facundo.cabral.val@gmail.com · (+51) 925 583 205 ·  ·  · 

Economics student with experience in data analysis and econometric-statistical modeling. I have worked as a data consultant on high-impact projects. Specialized in data exploration, analysis, visualization, and presentation. Proficient in Python, R, and SQL. Bilingual (Spanish and English). Known for versatility, teamwork, and a strong sense of responsibility.

EDUCATION

Universidad Nacional Mayor de San Marcos (UNMSM)

Lima, Peru

B.Sc. in Economics | Concentration in Business and Financial Analysis

Apr. 2022 - Present

Relevant Coursework: Macroeconomics, Financial Analysis, Econometrics, Statistics

Honors: GPA: 4.07 (Top 10% of the class)

PROFESSIONAL EXPERIENCE

National Directorate of Drugs, Medical Supplies and Drugs (DIGEMID)

Lima, Peru

Data Analyst Consultant

Mar. 2026 - Apr. 2026

- Conducted an institution-wide diagnostic across all directorates to identify operational bottlenecks and propose a strategic roadmap for process automation and data-driven decision-making.
- Developed the front-end and back-end architecture for a Pharmacovigilance Notification Dashboard, ensuring compliance with WHO VigiFlow standards for public reporting of adverse drug reactions.
- Designed the data integration pipeline for the Suspected Adverse Reactions (SAR) system, delivering a structured and deployment-ready solution for public health monitoring.

Faculty of Economic Sciences - UNMSM

Lima, Peru

Teaching Assistant (Econometrics)

Jan. 2026 - Present

- Assisting Professor Marvin Padilla in teaching basic econometrics and inferential processes to +100 students.
- Developing Python applications for advanced classroom topics related to socio-economic and macroeconomic issues.

BBVA in Peru

Lima, Peru

Engineering & Data Intern

Jun. 2025 - Oct. 2025

- Developed interactive dashboards in Looker Studio for analyzing and monitoring loan disbursement indicators across various products, enabling team KPI auditing.
- Designed an ETL pipeline in Python to process >50k records related to Net Promoter Score (NPS) calculations in Operations, automating data loading and reducing manual intervention.

EXTRACURRICULAR TRAINING

Sunass Datathon 2026

Lima, Peru

Category Winner: Commercial (Central Coast Region)

Apr. 2026

- Developed an analytical solution to detect calculation errors in billed volume and collected amounts to improve the commercial and financial management of water utility companies (EPS) in Peru.

Techy, Data Science School

Lima, Peru

Techy Winter Lab 2025 Scholarship - 5th Place

Sep. 2025 - Jan. 2026

- Selected as one of 22 scholars (14.4% admission rate) in a program designed to enhance technical and soft skills for public university students through expert-led Data Science lectures.
- Completed training in Python for programming fundamentals, computational analysis, ETL processes, interactive data visualization, and Supervised/Unsupervised Machine Learning.
